Gear up to get fit with your dog

May 20 | By [Caroline Hwang](#)

For rookies or when it's hot

Planet Petco's Luv Gear TempAlert apparel (starts at \$19.95, [Petco.com](#))

Using technology originally designed for babies, this line of pet gear has heat sensors that will alert you when your pooch's temperature hits that dangerous 100 degree-mark (at 105 degrees Fahrenheit, he's at risk for heat exhaustion or stroke.) In summer, you'll probably want the harness rather than the extra layer of a tank dress or T-shirt.
